

MUSIC NOTES COME ALIVE IN THESE TIMELESS CHILDREN'S FAIRY TALES

In 1000 AD, Guido D' Arezzo, developed a music staff notation, created a system of four-lined staves, and invented "solfege" – the framework we know today as "do, re, mi, fa, so, la, ti, do." These innovations had a massive influence on the development of Western musical notations and practice. This remarkable man and historical story inspired us to write these heart-warming Fairy Tales, "**Abram Creates Music**" and "**Once Upon a Jingle.**" Our character "**Abram**" is the fictional character that depicts Guido D' Arezzo, the inventor of Music Notes.

"**Once Upon a Jingle**" depicts our animated music note characters, "**Jingle King & The Notes.**" This timeless children's fairy tale takes our readers on an epic journey around the world. Jam-packed with adventures, music education, and dazzling philanthropic missions. Each chapter will warm the hearts of children and adults alike.
